Designing UX, UI, interactions for web & mobile, and developing apps for iOS and Android with a goal to create experiences that aim to reduce customer pain points, increasing customer delight, and improving KPIs.

- 7+ years of experience in designing, developing, and delivering products with end-to-end responsibility for mobile platforms.
- Designing & improving usability and user-interaction aspects of mobile platforms; A keen eye for design backed by experience both in terms of research and interface/interaction design work in various products.
- UX and UI Design - iOS, Android, Web, Mac OS, Apple Watch, Apple TV, and want to explore more. I strongly believe in designing based on data and proven design principles.
- Successfully shipped solutions for renowned clients worldwide – LexisNexis, KPMG, CGS Inc., and Konami being some of them.
- Expertise with technologies such as Apple Watch and Apple tvOS.
